

General Overview

The “RLM-Fin” calculators series are full simulations of the well known HP-12C calculator in their two versions, the **Classic** (prefix “**C**”) and the **Platinum** (prefix “**P**”) or Anniversary editions.

The “HP-12C” was designed and introduced by Hewlett-Packard in 1981. It is still on the market and is the longest lasting electronic gadget ever. It remains the standard for finance and business professionals around the world.

The Platinum or Anniversary edition is an updated version of the classic with the same functionality and some additions (mainly the look and the Algebraic logic entry mode or “ALG” mode).

The RLM-Fin calculator apps series includes 6 versions of the same calculator. The differences are the price and the “Premium” features included. Nevertheless, through “In-App-Purchase”, the entry level calculators (CF, CL, PF & PL), can be upgraded to a full featured version (CX or PX). Summarizing, the differences are:

| | Cost (USD) | Default Calculator | In-App-Purchase | Premium Features & Menus |
|-------------------|------------|--------------------|-----------------|-----------------------------|
| RLM-Fin-CF | Free | Classic | \$9.99 | None |
| RLM-Fin-PF | Free | Platinum | \$9.99 | None |
| RLM-Fin-CL | \$4.99 | Classic | \$4.99 | Finance Menu & All Settings |
| RLM-Fin-PL | \$4.99 | Platinum | \$4.99 | Finance Menu & All Settings |
| RLM-Fin-CX | \$9.99 | Classic | None | All Menus & Settings |
| RLM-Fin-PX | \$9.99 | Platinum | None | All Menus & Settings |

The “CX” and “PX” calculators includes a complete set of “Premium” features & functionalities that expand the calculator to another level, far beyond the real HP-12C. The “CF”, “CL”, “PF” and “PL” versions, can be upgraded to the “CX” or “PX” through In-App-Purchase that unlock all the “Premium” menus & features.

"Premium" Menus (**OPT** key)

| | | | |
|---------------------|---|---------------------|---|
| Finance ▶ | Amortization Table Depreciation Table Bonds Price & Yield Black-Scholes OVM Cash Flows Calculation Cash Flows Editor | Scientific ▶ | Math Functions Angles & Polar Regression Model Units Conversion Edit Units Database |
| Business ▶ | Margins & Break-Even Tip & Bill Split Currency Exchange Date & Time | Convert ▶ | Angles & Polar Currency Exchange Units Conversion Edit Units Database |
| Statistics ▶ | X,Y Data Editor Regression Model Probability | Utilities ▶ | Tip & Bill Split Currency Exchange Date & Time Math Functions Units Conversion |
| Program ▶ | Load Program... Program Debug Program Editor | System ▶ | Settings Memory Edit Units Database Help Documents |

Since the RLM-Fin apps are full simulations of the real HP-12C, we strongly recommend that you download the original calculator Owner's Manual from the HP website at "www.hp.com". All the functions, examples and features described in this manual are valid for this calculator.
