

Percent Total Menu (%TOT)

The Percent Total section allows you solve the simple Part-Total-% of Total relation in a direct way.

Button	Button Actions
	Stores or calculates the Part value. PART = TOTAL · %TOT ÷ 100
	Stores or calculates the Total value. TOTAL = 100 · PART ÷ %TOT
	Stores or calculates the Percent of Total value. %TOT = 100 · PART ÷ TOTAL

Example: The total assets of a company are \$67,584 and has an Inventory of \$23,457. What percentage of the total assets is the inventory?

Solution: Follow the next sequence:

Keystrokes	Description
23457 	Stores the inventory value. PART = 23,457.00
67584 	Stores the total assets value. TOTAL = 67,584.00
	Calculates the percent of total. %TOT = 34.71
