## **Trigonometric Functions Menu (TRIG)**

SIN	Calculates the <b>sine</b> of the displayed value. Assumes the angle in the current angle units.
COS	Calculates the <b>cosine</b> of the displayed value. Assumes the angle in the current angle units.
TAN	Calculates the <b>tangent</b> of the displayed value. Assumes the angle in the current angle units.
ASIN	Calculates the <b>arc-sine</b> of the displayed value and express the angle in the current units.
ACOS	Calculates the <b>arc-cosine</b> of the displayed value and express the angle in the current units.
ATAN	Calculates the <b>arc-tangent</b> of the displayed value and express the angle in the current units.

Note: All the calculations are performed considering the currently selected angle mode.
